INFORMATION | INOS AUTOMATION SOFTWARE

inos was founded in 1997 to supply intelligent robotic and sensor-engineered applications to the automotive industry. inos focuses on demanding applications for automotive and machine engineering as well as for intralogistics. As your system partner inos provides solutions for

- Intelligent, sensor-based robot guidance for high-precision joining, positioning, flexible parts and materials handling as well as objects depalletizing
- Inline quality assurance in the ongoing production process including gap/flushness measuring, geometry testing and verifying customer-specific configurations
- General image processing and sensor-engineered applications

The year 2010 was for inos all about globalization and cooperation with Grenzebach. Being part of this global group of companies, inos now disposes of a strong partner and a world-wide sales and service network.

Grenzebach is a supplier of intelligent production and handling systems and trusts in their own manufacturing in Germany, the US and China. With their own sales and service locations, they can ensure quick reaction to customer demands and local on-site support.

inos uses this global market presence for close customer contact - from sales via installation and commissioning up to service interventions, quick spare parts supply and on-site training. inos and Grenzebach combine their know-how to offer design and manufacturing, mechanical and electrical engineering, robotics and sensor technology, control and automation technology - all under one roof.

inos – world-wide your perfect partner for intelligent, highest-level robot guidance.
